AisleFrame™

Make IT Scalable

AisleFrame is an efficiently engineered system
that can be **easily expanded** as needed
in order to handle additional racks and infrastructure.

Frame IT Up

There's a moment when a new product
single-handedly changes an industry.

That moment is here.

Make IT Flexible

AisleFrame delivers an **endless array of fixing options** for cable tray, fiber runner, busway and more.

Fast design, manufacturing and installation times are all expertly handled by Subzero.

Fiber Runner

Power Busways

Panels

Ladder Rack

Brush

Cabinet Docking

Containment

Customize IT

No data center is the same.

AisleFrame is a **completely customizable** freestanding support structure, built to support your critical environment from the ground up.

Subzero will ensure your AisleFrame addresses all your specific deployment needs from Engineering to Implementation.

Make IT Simple

A single turnkey solution.

AisleFrame brings together the key components of
containment, cable and power pathways, and cabinet docking
in a **single modular structure**.

It is the **simplest solution available** to support
today's ever-changing data center environments.
