

INTRODUCING

COMPOSITE AISLEFRAME (CAF)[™]

The Future of Data Center
Infrastructure is here

- ✓ 50% Lighter
- ✓ Longer lifespan
- ✓ 100% Recyclable

Redefining Sustainability

Transform your data center with our revolutionary composite framework that delivers unmatched environmental benefits without sacrificing performance.

SUBZERO
ENGINEERING

V04 01.01.2026

KEY ADVANTAGES

Sustainability Champion

- ✓ Up to 4,332 kg CO₂ savings per frame
- ✓ 100% recyclable materials
- ✓ Reduced transportation emissions

Superior Economics

- ✓ 50% lighter than steel alternatives
- ✓ Significant construction cost savings
- ✓ Lower installation and transportation costs

Enhanced Performance

- ✓ Equal seismic ratings to steel
- ✓ Non-conductive (no grounding required)
- ✓ Superior shock and impact resistance

Deployment Simplified

- ✓ Installation by 2-3 people in half a day
- ✓ No special tools required
- ✓ Easily reconfigurable as needs change

Engineered for the Modern Data Center

- ✓ Adaptable for AI/HPC deployments with direct-to-chip liquid cooling capabilities

Experience firsthand how CAF can transform your data center's sustainability profile while reducing your total cost of ownership.
