EGG CRATE CEILING GRILLE

Airflow Management

Providing Increased and Efficient Cooling

Our Egg Crate Ceiling Grille airflow management solution is an important tool in helping design an energy efficient data center. It is designed to work with the natural properties of rising hot air.

The Subzero Engineering Egg Crate Ceiling Grille is used most effectively with hot aisle containment to allow hot IT equipment exhaust air to pass into the drop-ceiling void and be directed back to the AC unit. This allows for warmer, dryer air to return to the AC unit. As a result, the AC unit functions more efficiently and can provide increased cooling.

Easy to install and comes with a one-year warranty!

KEY FEATURES

- Stock Sizes
- Easy Installation

PRODUCT OPTIONS

- Various Size Options
2'W x 2'L or 2'W x 4'L
